

Research Data Management

the summer edition – courses in June & July 2025

Learn how to handle your data professionally and receive life hacks for organising, structuring, storing, archiving, publishing, and sharing

In your research, research support work, or graduate theses, you work with a variety of research data – although you might not call them like that. Think of references and bibliographies, photos, interviews, maps, protocols, 3D Scans, letters, film sequences, measurements, diaries, project websites, memos... In the introductory courses you receive life hacks for organising, documenting, archiving, and publishing your data. We offer mini workshops where you can use your new knowledge directly on your own data and in-depth courses on certain data types!

Introductory Courses

Research Data Management for Doctoral Students in the Humanities

Helpful tips for documenting, organising, storing, sharing, and publishing your research data.

Course open also for master's students!

- 08./10.07.2025, 2-4 pm, German, online

Special Topics

Image Data in the Humanities

Digital images as research material have become commonplace in the humanities. This course covers formats, colour profiles, metadata, administration, and cataloguing.

- 02.07.2025, 1-4 pm, German, online

Mini-Workshops

After a 20-minute introduction to the topic, you can ask questions and/or apply what you have learned to your own data with support by the lecturer in the remaining time.

Data Organisation

File naming, Folder structure, README files, File Formats, Version control, Backup

- 15.07.2025, 6-8pm, German / English (as needed), online

Archiving and Repositories

Aspects of archiving, selecting a repository, services of the University of Vienna

- 26.06.2025, 4-6pm, German / English (as needed), online

FAQ

Where can I register? In our new course database urise.univie.ac.at (Login with u:account)

Do you offer personal consultation?

Yes, please contact our helpdesk at rdm@univie.ac.at or your Data Steward. ▼

Can we book a course tailored to our specific needs? Yes! See "Build a custom workshop" on rdm.univie.ac.at.
